SKILLS

Expertise Area/Area(s) of Interest :

- Competitive Coding, Data structures and Algorithms, Machine Learning

Programming Languages(s) :

- C, C++, HTML, CSS, Javascript, Java, Python, React.js, Next.js, SQL.

Tools and Technologies :

- VS code, Git, PostgreSQL, MongoDB

Technical Electives :

- Database, Operating System, System Design.

Industry Oriented Skills :

- Time Management, Communication, Team Player

EXPERIENCE/INTERNSHIP

Bharat Internship :

- The duration of internship was five months as a App Developer (August 2023 - December 2023)
- As a part I worked on website Designing, Image Enhancement.

Oasis Infobyte Internship :

- The duration of internship was four months as Data Scientist.
- As a part i worked on Model Predictions, Image Processing,

EDUCATION

B.Tech(Computer science and business systems)

JSPM Rajarshi shahu college of engineering, Pune

2022-2026

CGPA:-8.87 / 10

B.S in Data science

IIT Madras

2024-2028

Cleared Qualifiers Entrance

LANGUAGES

English

Hindi

Marathi

PROFILE

As a second-year student pursuing a degree in Computer science and business systems, I am passionate about software engineering and committed to mastering relevant technologies. With a solid foundation in programming languages such as C,Java, C++,Python.I have completed projects that demonstrate my ability to design, develop, and implement software solutions. Outside of academia, I enjoy , Travelling , Playing Sports , Reading books ,Solving problems which have honed my problem-solving skills and ability to work effectively in teams. Eager to learn and contribute to innovative projects, I am seeking opportunities to apply my skills in a dynamic team environment.Passionate about problem-solving on Leetcode platform and participated in various Context Codewolf(Rank 7) and Code2.0.

PROJECTS

Vehicles and People Detection using OpenCV

Github Repo-:<https://github.com/AtharvaAnbhule/VehicleDetection/tree/master>.

- Implemented with the help of Python programming language and the OpenCV library.
- vehicle detection processes on the road are used for vehicle tracking, counting the average speed of each vehicle, traffic analysis, and vehicle categorizing objectives.
- Hashing images is a technique used to represent images as compact numerical values (hashes) while preserving their similarity relationships.
- Achieved over 90% accuracy in detecting vehicles and pedestrians in various environmental conditions.

Hotel Booking and Messaging application

Github Repo-:<https://github.com/AtharvaAnbhule/Hotel-booking-and-Messaging>

- Technologies used:- Next.js,MongoDB(database),Prisma ORM,Pusher,NextAuth,Tailwind,Next App Router,Stripe Payment gateway.
- It has Essential features like Adding your own Hotel with Location on map,Total counts of Rooms and Description,Search and Filters,Authentication,Responsive design,Booking maqnagement.
- By implementing user-friendly features, such as personalized recommendations and interactive interfaces, I increased user engagement metrics by 20%.
- my efforts in implementing robust error handling and debugging mechanisms led to a 30% decrease in technical issues.

Rank Tracker App

Github Repo-:<https://github.com/AtharvaAnbhule/Rank-Tracker>

- Technologies used:- Next.js,MongoDB(database),Prisma ORM,NextAuth,Tailwind,Next App Router.
- This App is used to track ranking of websites on Google for SEO.
- It has Essential features like Authentication,Graphs/Charts,Domains page,Saving Domains,Keywords page.
- By implementing advanced algorithms and data analytics techniques, I improved the accuracy of keyword ranking predictions, resulting in a 20% increase in user satisfaction. Additionally, I enhanced the app's scalability, allowing it to handle large volumes of data with ease, leading to a 30% decrease in processing time.

Post Clone

Github Repo-:<https://github.com/AtharvaAnbhule/Twitter-clone/tree/master>

- Technologies used:- Next.js,MongoDB(database),Prisma ORM,NextAuth,Tailwind,Next App Router.
- This App is Used to Post content with Images and other users can comment on post.
- It has Essential features like Authentication,Comments,Profile Edit,Like,Follow/Unfollow,Responsive.
- Introducing innovative features like real-time notifications and threaded conversations, I boosted user engagement.
- These achievements underscore my ability to deliver cutting-edge solutions and drive meaningful impact in complex software projects.
