EDUCATION

Bachelor of Computer Engineering, JSPM Rajarshi Shahu College of Engineering, Pune Expected 2026
CGPA:8.87

SKILLS

Programming Languages	C/C++, Java, Python, .NET
Core Competencies	DSA, Machine Learning, DBMS, OOP
Frameworks	React.js, Next.js, Node.js, Spring Boot
Databases and Services	SQL, NoSQL, Git, Linux
DevOps	AWS, Kafka, Kubernetes, Docker, Oracle Cloud Infrastructure (OCI)
Data Analysis Tools	Data Validation, Reporting, Power BI, Pandas, Numpy
Additional Skills	Debugging, Agile, Collaboration, Communication

KEY ACHIEVEMENTS

- **Winner of Smart India Hackathon (SIH):** Implemented an innovative solution to address real-world challenges which motivated using advanced AI/ML techniques.
- **Open Source Contribution:** Contributed bug fixes and improved API utilities in LangChain, enhancing LLM-powered workflows and developer adoption.
- **Participated in Rotaract Club activities:** Volunteered with Rotaract Club, leading 10+ initiatives that impacted 300+ beneficiaries and increased community participation by 40%.
- **2nd Prize – IIT Madras Debugging Challenge:** Demonstrated strong analytical and error resolution skills.

EXPERIENCE

Software Developer Intern – Data Engineering January 2025 - May 2025
Intel Pune, India

- Established and deployed scalable machine learning pipelines using Python, TensorFlow, and REST APIs, improving inference efficiency by 30% and reducing model update time by 25%.
- Provided ML microservices with SQL databases and internal backend APIs to enable real-time predictions and improve data access latency by 20%.
- Launched an automated monitoring and drift detection system to track model performance, achieving 90% anomaly detection accuracy and cutting debugging time by 28%.

Software Development Engineer Intern June 2024 - January 2025
Rk Innovate Pune, India

- Developed and deployed Spring Boot microservices on AWS, integrating REST APIs and CI/CD workflows in an Agile SCRUM setup, improving reliability and scalability by 35%.
- Crafted cloud-based monitoring and automation pipelines, enhancing system scalability and reducing incident recovery time by 40%.
- Architected internal alerting and performance tracking systems, leading to faster deployments and a 30% boost in overall system reliability.

PROJECTS

Customer Management Platform and Website Builder (Workeloo CRM) [Live](#)

- Designed and launched 5 interactive landing pages using Next.js, integrated with real-time user activity tracking and email marketing, boosting user sign-ups by 25% and generating 300+ new registrations in the first month.
- Optimized a custom CRM using Java Spring Boot, PostgreSQL, Prisma, and Docker, improving request speed and reducing quarterly downtime from 10 to under 4 hours.
- Engineered secure workflows and automating project and employee management processes, reducing manual effort by 90%, and supporting multiple accounts and flowchart-based operations.
- Implemented a predictive analytics module using machine learning to monitor system health and detect anomalies, enhancing reliability and issue resolution across dashboards and workflows.

Coffee Shop Customer Service Chatbot [GitHub](#)

- Coordinated the development of an AI-powered chatbot using NLP, ML, and information retrieval techniques, integrating scalable APIs and multi-platform deployment, showcasing data structures, algorithms, and problem solving skills while improving response accuracy by 35%.
- Enhanced an intelligent recommendation engine using Market Basket Analysis and association rule mining, increasing upsell conversions by 25% and improving average order value by 18% across 1K+ customer transactions.
- Integrated backend workflows for agent communication and user profiling, showcasing strong understanding of data structures, API design, and cross-platform integration.
